

Announcement

PhD candidate in cognitive neuroscience Tromsø, Norway

The research group for cognitive neuroscience at the university of Tromsø is looking for an enthusiastic PhD candidate who would like to build a career in the cognitive neurosciences. Our lab is based at the Institute of Psychology at the University of Tromsø in the beautiful city of Tromsø, Norway.

The project

The PhD will work in the project “Neural and computational correlates of mind wandering” which has the ambitious goal to find brain correlates of mind wandering. The project potentially involves a multitude of involved techniques and methods such as fMRI, EEG, eye-tracking, cognitive modeling and advanced statistical analyses. The project is embedded in an active collaboration between the research group for cognitive neuroscience at UiT and Birte Forstmann’s lab at the university of Amsterdam. Frequent and/or extended visits to our collaborating group are planned.

We encourage interested candidates to contact Matthias Mittner for further information about the project.

The candidate

The prospective candidate must hold a Master or equivalent in psychology, informatics, physics or other areas relevant to the research project. Experience with any of the abovementioned techniques techniques will count in favour of the candidate as will experience with programming in any programming language.

The group

The research project is led by principal investigator Dr. Matthias Mittner and is embedded in the research group of cognitive neuroscience at the institute of psychology. We collaborate extensively with Prof. Birte Forstmann’s group at the University of Amsterdam.

What we offer

- Working in an innovative, well-equipped and scientifically stimulating surrounding
- An excellent international network
- A guaranteed fulltime position for the duration of 3/4 years under the generous regulations of the norwegian welfare system

Applications

Please send your CV and a letter of motivation to Matthias Mittner. Informal inquiries regarding further details are welcome.
